Discussion Forum

Nationwide Internet Access

Online Applications

(Submit comments on one or both issues, but please identify)

In the light of so much going on:

- Why do things cost so much now?
- Why can we not get broadband access now?
- Nationwide online education, healthcare?
- Why not have tele-centers all over the country now?
- How to manage the submarine cable capacity?

Looking ahead:

- What is our (stakeholder group's) role?
- How can we transform this workshop into a platform for discussions, to ask questions and offer solutions?
- What should be our recommendations?
